

Petition

For a new, peaceful, diverse, democratic Europe for all citizens!

To the European politicians, members:

- of the European Parliament
- of the European Council
- of the European Commission
- of the Committee of Ministers and the Parliamentary Assembly of the Council of Europe
- of the national parliaments and governments of 51 European countries

Ladies and Gentlemen,

We, the undersigned citizens of 51 European countries, demand a new, peaceful and democratic, diverse, federalist and subsidiary, strong, prosperous and sustainable Europe for the 21st century – a Europe that protects its minorities and in which we can all live together in peace and freedom. - In particular, we demand:

1. **A Europe open to all countries, incl. Russia and Ukraine** - allowing each country, in view of its rich historical experiences and achievements, to preserve and strengthen its traditions, institutions, cultures and languages - and **to cooperate peacefully, in various fields, for the good of all countries and peoples!**
2. **A subsidiary Europe, in which only what is absolutely necessary is delegated to “Europe”** - but not what free, peacefully cooperating countries can regulate themselves equally well or even better!
3. **A directly democratic Europe, in which we mature citizens have the last word on all important questions through referendums**, e.g. on our country's place in Europe, the accession of new member countries and on crises such as refugee tragedies, **pandemics, climate change and the war in Europe!**
4. **A Europe in which such crises are never again settled by wars, but peacefully with the ballot**, on the basis of - where necessary - difficult negotiations and fair compromises, and are **used as opportunities to strengthen democracy, peace and freedom, security, welfare and human rights - throughout Europe!**
5. **A strong, neutral Europe** which - to safeguard its security and independence, **to prevent wars and to strengthen peace** in the world - needs its **purely defensive army, consisting only of the armed forces of willing countries**, exclusively **to turn any attacker into a reliable partner!**
6. **A Europe to be created by democratic means, with a future-oriented constitution**, for which the citizens elect their country's representatives to the **constitutional council**, then **ratify the constitution in a national referendum** and finally implement it by means of **regular referendums** and develop it further according to their future needs!

Alarmed by the severe crises and the war in Europe, we ask you, ladies and gentlemen, with our mighty non-violent citizens' revolution online in all countries of Europe, to begin peace negotiations immediately, to lift the mutual sanctions and to realise our new Europe democratically and without delay together with us!

We can do this - dear members of governments and parliaments - e-democratically, bottom-up, together with you: a new era, our peace project Europe - a beacon for peace, freedom, democracy, human rights and human dignity in the whole world - Let's get to work! - Now!

Thank you very much!

Your mature and responsible citizens
(surname, first name, country)
